 5.0 m 935-BA50

WIELAND GST18I3S Female type
 Part no 92.931.3053.1
 VDE Approval no. 40018414

Cable cord specification
 H05VV-F according to EN 50525-2-11
 minimum 3 x 1.5 mm²

Considerations when using HDMI.
 Usually, you should not exceed a length of 8-10 meters for good signal! Amplifiers should be used at longer installations! There are many factors that affect the signal - the cables quality, contacts, amount of data (resolution) and source strength.
