WELCOME TO **USB-C INTEGRATION**

TOMORROW'S TECHNOLOGY

Let Powerdot be your interface for communication between devices, or let it be a potent charging station. With our 'Powerdot PD16' only one single cable needed on the work desk or in the conference - it is the new future standard facilitate a "clean desk". This version of Powerdot is versatile - in spite of this, it has a significally low building height below desk.

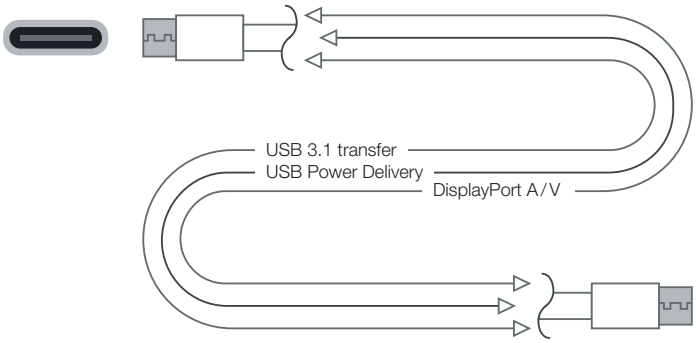

This port is equipped with Quick Charge 2.0 and charges your unit quicker than a conventinual USB/A charger. (QC2.0 5-12V, 1-2A)

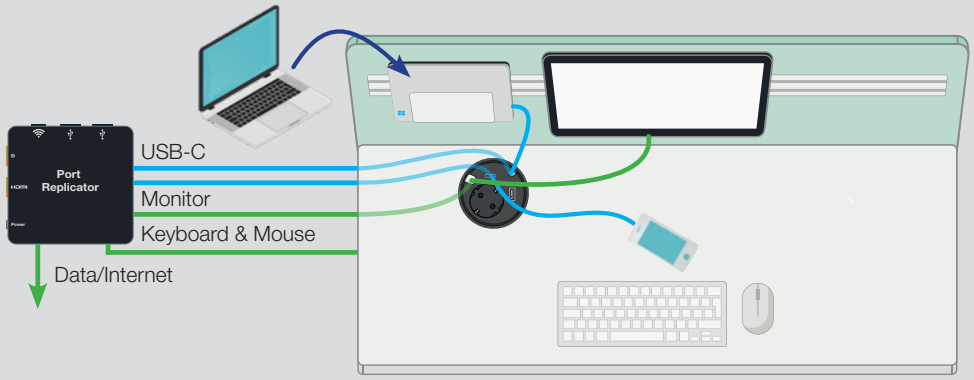

What is this future technology?

This port can be used for quick charging smartphones, tablets and compatible laptops; or can be connected to a docking station for access to internet, power, screens, keyboards, mice, etc - using one single cable.

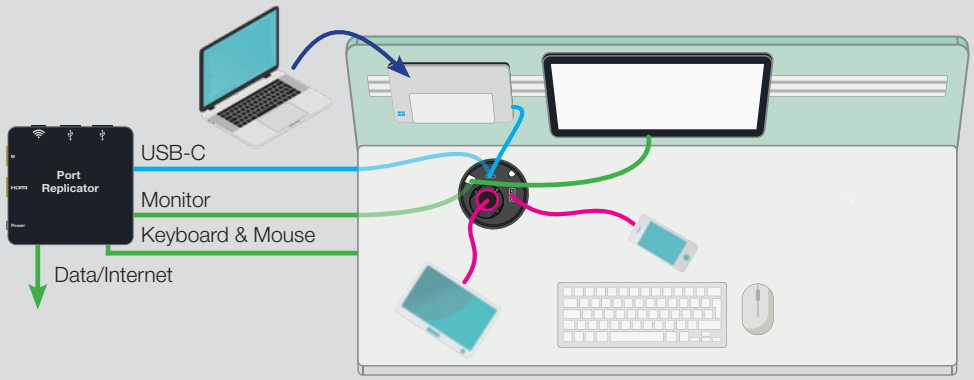

SUGGESTIONS OF HOW TO CONNECT

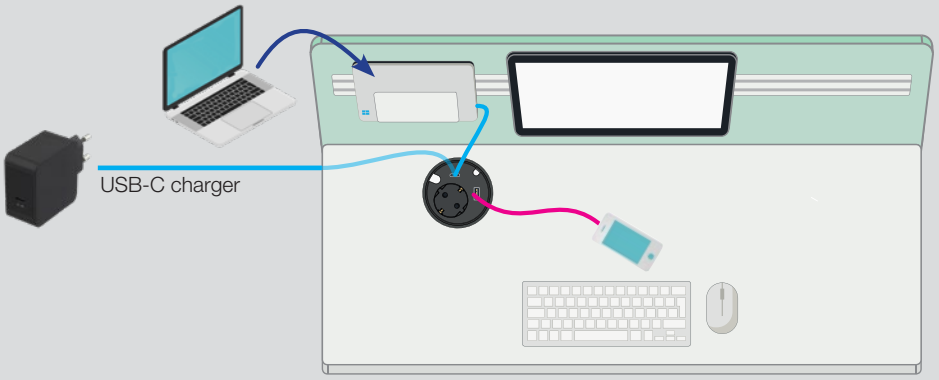

Computer connected via USB-C cable that runs via cable through.
Always connected when needed. Image showing mobile phone charged via USB-C connection.

Computer connected via USB-C jack.
Smooth operation when having you own cable along.
Image showing mobile phone **quick charged** via USB and tablet charger with ordinary (Schuko) charger.

Charging only.
USB-C cable to charge your laptop / mobile phone / tablet etc
